

dott. Dario Spitaleri

CURRICULUM VITAE and PROFESSIONAL

PERSONAL PRESENTATION

"You are the result of what you saw and what you lived" d.s.

I am the third son of four brothers.

I come from a family of teachers of Literature and Mathematics who moved to Friuli from Sicily in the 60s of the last century.

Numbers and letters, creativity and scientific rigor, rules and lateral thinking since I was born.

After the scientific studies at Magrini High School in Gemona del Friuli I graduated in Dentistry and Dental Prosthetics at the University of Trieste discussing the thesis "Dental Cements in Prosthetic Clinic".

I obtained the qualification for the profession of dentist at the University of the studies of Modena and since 1999 I am registered in the Register of Dentists in Udine (Italy) and from 2013 to Malta Medical Council.

In my professional career I worked also in hospital centres (Department of Maxillofacial Surgery Hospital of Palmanova, Department of Maxillo Facial Surgery San Marco Policlinico - Venice, Dental Clinic St. James Sliema Hospital - Malta) and I had the pleasure to collaborate with many colleagues from Triveneto who have been from great stimulus and growth of my business.

For some years I have been a technical consultant for some medical companies for the development and the design of implant and surgical devices.(NuovaGeass, Implamed, Cirg, Futura, Dei Italia, Tressis, Titanmed, IML, SafeSicurezza...)

In addition to the great attention to my profession, I am passionate about communication, mental coaching and personal growth. In the past years I have trained in communication subliminal and hypnosis at the ICS institute in Rome and I studied the topic attending the seminars of Giuseppe Vercelli and Paul McKenna and Giorgio Sallusti. I followed several training courses of Peak Potentials Training, PerformanceStrategies and Raima Communications where I became Dental Coach.

I am the Co-founder of the Academy of Education "I pilastri della mente".

In 2015, together with some colleagues, I founded the Slowdent movement, open to colleagues and their patients. Slowdent is a project and a sharing program based on values on transparent, sober, fair and respectful dentistry where the therapeutic alliance is at the basis of respect and achievement of results.

In 2016 I founded the Safe Spitaleri Medical Clinic.

I support the Rotary World Foundation and I share and try to pass on it values.

Beyond the work, I take care of my passions ... my family, music, sport overall mountaineering that led me to create the MountainCinema Event.
